

TIPATECH T-18

Ecological Whole House Filtration System

Experience cleaner, better-tasting water with the TipaTech T-18 - an innovative, sustainable whole-house system, designed to help reduce a range of water-quality concerns.

Pair it with our LotusDY under-sink purifier for point-of-use refinement and a complete whole-home & kitchen solution.

FEATURES **8 + STAGES** **> 0.1micron**

AIR RELEASE - GLOBAL PATENT

Designed to release toxic gases such as radon, sulfur & chlorine that may be present in source water. Designed to reduce aerobic bacteria growth and parasites.

LEAD REDUCTION

Three-stage approach designed to help decrease lead levels from the water supply and help reduce lead leaching associated with internal plumbing components.

SCALE REDUCTION

Designed to reduce scale buildup in pipes, tanks, and appliances - up to 99% without salt or traditional softening chemicals. May support longer appliance life and improved efficiency; may also support a softer-feeling shower and laundry experience.

MAINTAINS MINERALS

Unlike many reverse-osmosis (RO) systems and salt-based softeners that can strip minerals, the T-18 is designed to retain beneficial minerals naturally found in water

CONTAMINANT REDUCTION

Designed to reduce certain heavy and light metals, agricultural chemicals, chlorine, fluoride, arsenic, and more.

CHLORINE REDUCTION

Designed to reduce chlorine throughout the home while maintaining the required level to prevent bacterial regrowth inside the pipes. Recommended to pair with LotusDY at point-of-use for final taste refinement and additional reduction where needed.

WHY CHOOSE TIPATECH?

GLOBAL UNIQUE PATENT

Patented technology designed to support whole-house water quality and long-term reliability.

ECO-FRIENDLY

No electricity, salt or softeners. Flushing per month required (no harmful wastewater, safe for plants).

EASY TO INSTALL & MAINTAIN

Compact in size yet powerful in performance. Cartridges to be replaced every 6-12 months.

TAILOR MADE CARTRIDGES

Omega cartridges can be added to the T-18 to boost filtration levels of locally specific contaminants.

CERTIFIED

compliance to applicable standards:
NSF/ANSI/CAN 372-2002
NSF/ANSI 42
NSF/ANSI 61

WARRANTY

Limited Five-Year warranty
(t's & c's apply)

SPECIFICATIONS

Screw threads: 1" (BST or NPT)
T-18 Height: 15.35" (39cm)
T-18 width: 6.53" (16.6cm)
Working pressure: 30psi - 80psi (2.06bar - 5.5bar)
Flow: up to 1,300 Gallons per hour (4,921 Liters)

Disclaimer: This one pager is for general informational and marketing purposes only. Actual performance depends on source water quality, plumbing, installation, and maintenance. Statements about contaminant reduction reflect design intent unless supported by applicable third party certifications or test results for the specific model/configuration. Micron ratings refer to filter media design and do not represent a guarantee for every contaminant. Not medical advice.
